Backend: Node.js, .NET Core, ASP.NET, Entity Framework, REST APIs, WebSockets

Frontend: React, Vue, TypeScript, Next.js, Material UI, Tailwind CSS, Styled-Components

Tools & DevOps: Git, CI/CD, Webpack, Vite, Figma, Agile/Scrum

Database & Cloud: MSSQL, MySQL, PostgreSQL, Azure, Google Cloud, Docker

Education

Asõ Vux | 2020 – Vocational

Interests

AI and Machine Learning, Movies, Music and Gaming

Full-stack developer with 6+ years of experience building React/TypeScript frontends and Node.js/.NET backends for SaaS products and data-heavy applications. Strong focus on UI implementation, frontend performance, legacy migration, and practical product delivery.

Open to remote roles across Europe.

Professional Experience

Full-Stack Developer

SoftTeco | 05/2024 – 02/2026

- Built WCAG-compliant React/TypeScript components, improving usability and responsive behavior across devices.
- Improved frontend performance for mobile-first environments, helping pages load and become interactive faster, increasing engagement and SEO scores.
- Collaborated directly with design teams to translate Figma prototypes into pixel-perfect code

Full-Stack Developer

Ungapped | 03/2021 – 02/2024

- Led migration of a large KnockoutJS codebase to Vue 3, simplifying architecture and reducing time to add new features.
- Built and evolved a drag-and-drop marketing automation builder handling complex user flows and high-volume data, used daily for campaign creation and orchestration.
- Developed backend services and Azure Functions in C#/.NET for email delivery, subscriber synchronisation, and campaign analytics.
- Optimized MSSQL queries and LINQ segmentation logic for large datasets, reducing query times and improving reporting responsiveness in the app.
- Delivered features across the in-house email, survey, and web page editors, contributing to both product capability and day-to-day user workflow.
- Built animated data-visualization components to display global and incremental statistics, improving clarity of campaign metrics and real-time user insights.

Web Developer

Freelance | 2020 onward

- Delivered end-to-end web solutions (React/TypeScript, Node.js/.NET, SQL) for small businesses, from requirements and design through implementation, deployment, and maintenance.
- Built custom websites and features focused on practical business needs and maintainable code, often replacing outdated or DIY solutions.
